Laura Meade
Professor of Supply Chain Practice
Texas Christian University (TCU)

l.meade@tcu.edu

Dr. Laura M. Meade is a professor of supply chain practice in the Neeley School of Business at TCU. She graduated with a BSME from Valparaiso University, and later attended the University of Texas at Arlington where she received an MBA and a PhD in industrial engineering. Her work experience includes General Dynamics and the Automation and Robotics Research Institute.

She has published several articles in the areas of enterprise modeling, supply chain management, reverse logistics, and sustainability. Her research has been published in *Greener Management*, *IEEE Transactions on Engineering Management*, *Engineering Management Journal*, *Supply Chain Management International Journal*, *International Journal of Production Research*, *Logistics and Transportation Review Journal*, and *Omega International Journal of Management Science*. She has also taught courses related to supply and value chain management, including operations management, procurement, supply chain management, global SCM, and strategy, and has led several student groups through company-sponsored projects. She is a member of Decision Sciences Institute, the Institute for Operations Research and Management Sciences, and the Council of Supply Chain Management Professionals (CSCMP).
